

## Technical Datasheet

### Product: Antimicrobial Polypropylene Masterbatch

#### Grade: C1PP-AMM4

##### Product Description:

C1PP-AMM4 is an antimicrobial polypropylene masterbatch using nanotechnology. C1PP-AMM4 creates a good balance between antibacterial, antifungal and anti-algae properties in polypropylene. This product also prevents the formation of biofilms on the wall of the product by creating a super hydrophobic property in polypropylene.

##### Applications:

- Body of evaporative coolers.
- Pipes and fittings.
- Wood plastics.
- Water storage tanks.
- Generally, polypropylene parts that are directly exposed to water and light.

##### Appearance:

Host Polymer	PP
Appearance	Granules
Color	Natural
Dispersion	Excellent

##### Physical Properties:

Properties	Unit	Value	Standard
Melt Flow Index (230°C , 2.16 Kg)	g/10min	25	ASTM D1238
Specific Gravity	g/cm <sup>3</sup>	0.9	ASTM D792

##### Antimicrobial Properties:

Properties	Type of Microorganism	R (Antimicrobial Activity)*	Standard
Antibacterial Performance	E.coli (ATCC : 25922)	2<	Iso 22196
Antibacterial Performance	S.aureus (ATCC : 25923)	2<	Iso 22196
Antifungal Performance	C.albicans (ATCC : 10231)	2<	Iso 22196

\* Antimicrobial activity above 2 is desirable.

**Dosage:** Using very low percentages of these materials (between 4-5% by weight) in the process of the plastic will result in the creation of genuine and complete antimicrobial components and structures.
